HAUSTEK

Now, it is the moment to reinvent, evolve, look ahead and anticipate the questions. Haustek expresses the best of Türkiye manufacturer in terms of reliability, beauty, emotion, technology and elegance.

We use the technology to give you more freedom. We create convenience to relax you. We follow the experience to make you more comfortable. We adopt the art to add more charm on your beauty. We develop clear solutions to be up to your standards.

We do all for you, enjoy it.

Everyone who owns a home will, at some time or another, need a new range for their kitchen, when you are considering a makeover, why not choose a distinctive design that satisfies the needs of the modern kitchen? Instead of cold and abstract concepts, our range enables you to create the flavors that will be an emblem of your creativity, in an environment that makes you the best ingredient in the kitchen where other things will seem details because our varied product range is perfectly integrated with one another.

Haustek offers a comprehensive range of hobs containing all possible cooking technologies. Whatever the cooking type is, the hobs are designed to be easily accessible, quick responsive, stylish, and easy to clean and fit all interiors.

Haustek gas hobs offer not only the quality but absolute safety.

Haustek gas hobs are redesigned to give larger or smaller cooking zones as required. Front knob controls combined with the color matching glass inlay are positioned to allow generous spacing between the burners; you will always have an easy and plenty of room to work comfortably.

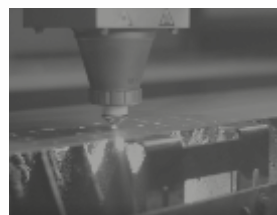

Dynamism, constancy and refinement are the driving forces that push Haustek towards changing. Passionate, innovative and original thinking has always been the essence of our company.

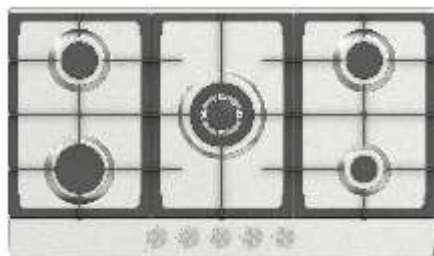

Burners placed either on the glass surface or the stainless steel tray to give you freedom in selection. Haustek gas hobs combine the traditional and modern lines together. While stainless steel surfaces are boasting of easy clean and resistance to fire, our distinguished gas hobs on glass inlay will prove its unique style as they have matching color with the grids.

It is not only professional cooks who are on fire when it comes to cooking with gas. The energy, which is just as economical as it is ecological, is perfectly suited to modern kitchens.

Gas ensures precise, quick cooking with exact and quick-reactive temperature controls. Pioneering design combined with the state-of-the-art technology of the glass ceramic gas hob. Professional and convenient controls are combined with the highest of safety standards. And, naturally, the lifelong experience of Haustek in the professional catering equipment line of business also flows into all of the gas appliances. Whatever you decide on, you will certainly rediscover your passion for cooking.

Safe burner flames under full control!

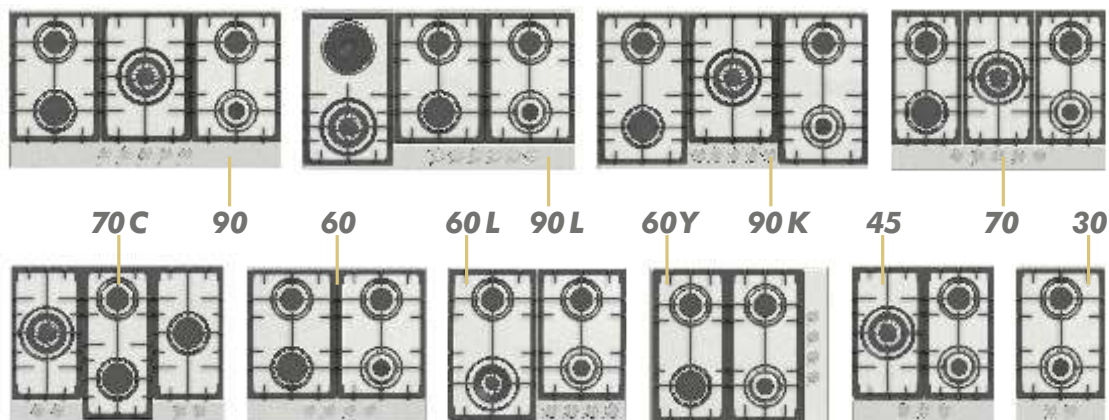

Flame Control is 9 levels of flame output adjustment to save on gas. Fire is always a serious business. With the safety features in Haustek gas hobs, there's no risk or fear in the kitchen, they are perfectly safe at all times. All gas-related risks have been minimised.

- ✓ FlameControl: the flame height can be perfectly adjusted to the food type and its processing.
- ✓ Stable cast iron supports mean good safety.
- ✓ Convenient operation with a tilt-back control panel and ergonomic design of the knobs.
- ✓ No need to use matches or lighters, each knob has a burner igniter.
- ✓ The flame safety valve cuts off the gas flow if the burner flame dies. It's always safe.

UNIQUE AND PRECISE CONTROL TYPES

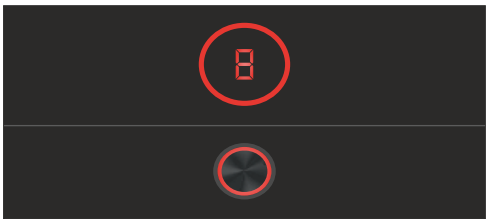

The comfort extends to the different types of access levels like the sensor control models, touch control electronic models or traditional soft touch buttons. If you wish you can also control the hood via remote control. All control types are produced in our exclusive workshop, where every part of the components we assembled is handled with outmost care and processed with years of experience. We minimise the tolerances, use reliable state of art equipment, and best possible automation to provide you the products differing from others in perfect details.

OPTIONS

SSD EXTRACTION SYSTEM

In our strive for continuous improvement and innovation, our R&D has created a technology that allows the hoods to maximize the extraction capacity surprisingly minimizing the noise level. Thanks to our Super Silent Dual Fan System, we minimize the mechanical noise with Dual ArcFan where the air flows over the 3D optimised blade and metal motor cabinet that hanged on the body of the hood, not inside the hood. This system offers significant advantages: such as air quality, noise level and energy consumption optimisation.
